## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Species 1: Figures 1-57, 73-80, and 104-106 drawn to a holder for a book, a magazine;
- Species 2: Figures 58-72, drawn to an optional accessory of illumination;
- Species 3: Figures 81-102, 107-111, drawn to a holder for laptop computer;
- Species 4: Figures 112 and 113, drawn to a holder for e-books (electronic books);
- Species 5: Figures 122-139, drawn to a holder for a binder; and
- Species 6: Figures 119 and 120, drawn to a paper pad.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 3632

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Group 1: Claims 1-8, 27-29;  
Group 2: Claim 9;  
Group 3: Claims 10-20;  
Group 4: Claims 21-25;  
Group 5: Claims 30; and  
Group 6: Claim 26.

None of the claims in the case appear to be generic.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the main feature that the species have in common is the cylindrical base and six-sided nut that attaches the base to axial joint support the "holder" portion of each embodiment.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
